Internships

Automation and production

[Apply online](#)

Description of the internship

- With us, you will work on the further automation of our production facilities and will carry out subprojects on our own responsibility. Furthermore, it will be your tasks to analyze the processes in the packing department and picking and to develop optimization proposals. You should also consider both ways to increase efficiency as well as quality management.

Further information

- Occupational field: Process management
- Degree: Industrial Engineering / Mechanical Engineering with specialization Production / similar technical course of studies
- Qualification: Completed basic studies for bachelor courses
- Other Qualification: Very good Microsoft Office skills, beneficial SolidWorks knowledge or similar CAD programs
- Accommodation: assistance with the search
- Remuneration: Yes

Graphic design

[Apply online](#)

Description of the internship

- Do you have a feeling for beautiful forms and creative abilities? Within the scope of an internship, we offer you the opportunity to independently solve the graphic tasks that are constantly being carried out in a company of size such as Rival. The mentioned tasks include, for example, new product labels, the design of our measuring stands with posters or banners, product catalog design and everything that happens. In addition to your commitment, we expect creative tasks, a look at the essentials and the feasibility of your ideas.

Further information

- Profession: Media designer / graphic designer
- Study direction: media design, graphic design or related or similar studies
- Qualification: Vordiplom or completed undergraduate studies for Bachelor studies
- Other qualifications: Desirable: knowledge of Adobe InDesign, Photoshop etc., as well as certain experiences and talent in photography and design
- Accommodation: assistance with the search
- Remuneration: Yes

Product development

[Apply online](#)

Description of the internship

- We offer you the opportunity to apply these skills as part of an internship. You will be able to deepen or learn how to deal with a volume program that you may not know yet. Your tasks include, for example, the improvement of functions and / or optics of our new and further developments. You will convert your ideas into SolidWorks into volume data and then produce prototypes to test haptics and ergonomics. In addition to your commitment, we expect creative tasks, a look at the essentials and the feasibility of your ideas.

Further information

- Field of work: product development and design
- Field of studies: Mechanical engineering with specialization design or design / product design
- Qualification: Completed basic studies for bachelor courses
- Other qualifications: Knowledge of SolidWorks or related programs such as Pro / E
- Accommodation: assistance with the search
- Remuneration: Yes
